

ATD

AUTOMATIC TRACER DISPENSER

- FLOW TRACERS (MARBLE-TYPE) ARE AUTOMATICALLY DROPPED INTO A SORTER DURING AUTO TEST CYCLES RATHER THAN PERFORMING AN AUTO TEST BY MEANS OF “ARTIFICIAL” LIGHT-PULSES.
- MANUAL TRACER TESTS CAN BE PERFORMED WITH ANY NUMBER OF TRACERS
- FLOW TRACERS ARE DISPENSED WHENEVER REQUIRED BY FLOW’S AUTOMATIC CALIBRATION STABILITY SYSTEM. (ACSS)
- FLOW’S TRACER DISPENSER HOLDS 2 “SEE-THROUGH” CASSETTES OF 86 TRACERS EACH. 86 TRACERS ARE TYPICALLY SUFFICIENT FOR 24 HOURS CONTINUOUS SORTER OPERATION.
- TRACER DISPENSING IS INDEPENDENTLY CONTROLLED FOR THE LEFT AND RIGHT SORTING CHANNEL.
- ALL TRACERS DISPENSED ARE ACCURATELY COUNTED BY TWO INDEPENDENT COUNTERS. ONE FOR LEFT CHANNEL AND ONE FOR RIGHT CHANNEL. (COUNTERS CAN BE RESET BY MEANS OF A KEY-SWITCH)
- **FLOW ATD CAN BE RETRO FITTED TO ALL FLOW SORT MACHINES!**
